

HOW BDT WORKS

Data Analytics and Technology

BDT uses data and technology to design solutions that improve access to essential benefits and services.

- ✓ Data-driven, targeted outreach and assistance
- ✓ Customized enrollment management software
- ✓ Tech-enabled, cross-channel, community-wide assistance

Direct Service

BDT architects and implements scalable, high-quality, person-centered assistance for individuals and families.

- ✓ Service delivery: web, phone, text, and in-person
- ✓ Comprehensive benefits
- ✓ Proactive, individualized outreach
- ✓ Service with dignity at scale

**An integrated,
person-centered
health and human
service system that
improves people's
economic, health &
social outcomes**

Policy and Practice Solutions

BDT works with government partners to leverage policy options and business process re-engineering to streamline access.

- ✓ Policy and process change
- ✓ Outcomes-focused research

Partner Engagement

BDT builds relationships with key stakeholders to deliver proven solutions at scale.

- ✓ Philanthropy
- ✓ Local, state, and federal government
- ✓ Community-based organizations
- ✓ Healthcare plans and providers
- ✓ Universities and leading research organizations
