

BENEFITS DATA TRUST CONNECTS PEOPLE TO BETTER LIVES

Today, more than \$80 billion in food, financial aid, healthcare, and other assistance goes untapped nationally.

Public benefit programs like the **Supplemental Nutrition Assistance Program (SNAP)**, the **Special Supplemental Nutrition Program for Women, Infants, and Children (WIC)**, the **Children's Health Insurance Program (CHIP)**, and **Medicaid** can help families in need pay for food, healthcare, housing, internet service, and more. However, barriers to access can make it challenging to apply and stay enrolled in these vital programs. By streamlining access to benefits proven to improve health and advance opportunity today, we can build pathways to economic mobility and a more equitable future.

Benefits Data Trust (BDT) is a national nonprofit, founded in 2005, that harnesses the power of data, technology, and policy to provide efficient and dignified access to these programs, improving people's health and financial security. Together with a national network of government agencies and other partners, we streamline public benefits systems and directly connect eligible families and individuals to assistance.

NATIONWIDE IMPACT:

Screened **1.3 million households** for benefits, securing **over \$10 billion** for families in need since 2005

Provided an **average of \$4,100** in benefits per household in 2022

Streamlined benefits access for **3.3 million people** through public policy changes since 2019

WHERE WE WORK

In 2022, we worked in **14 states** to streamline access to benefits for eligible individuals and families, including providing enrollment assistance through our benefits centers in Colorado, Maryland, Michigan, New York, North Carolina, Pennsylvania, and South Carolina.

OUR STRATEGIES

Our person-centered approach to modernizing benefits access improves health, equity & economic mobility.

Enroll

Proactively help people enroll in benefits

Equip

Equip other sectors to connect people to assistance

Streamline

Help government streamline access to assistance

Solutions

Increase solutions to improve access to assistance
